SIGMIDI Foot Controller v0.1 — Brand assets

The SIGMIDI mark uses the supplied outline at fixed proportions. All SVG palettes share the same path geometry.

Asset	Use
`sigmidi-mark.svg`	Green mark for light backgrounds and installer favicon
`sigmidi-mark-light.svg`	Pale mark for dark backgrounds
`sigmidi-mark-original.svg`	Purple mark
Matching transparent PNGs	Render-sheet composition
`logotype-original.png`	Supplied image
`sigmidi-mark-cad-25mm.json`	Proportional 25 mm CAD outline

The LCD uses the alpha bitmap in `src/logo.hpp`; the Wi-Fi editor and web flasher use SVG. Left enclosure shells carry a 25 mm-wide, 0.6 mm-raised mark between A and B.

Run `scripts/prepare_logotype.py` with Python/Pillow to generate interface assets, then rebuild firmware if embedded assets change. Trace checksums are in `logotype-provenance.json`.
